## PLASTIC FREE CAMPUS POLICY

Single-use plastics may represent the epitome of today's throwaway culture. Most of our plastic ends up in landfills, our oceans and waterways, and the environment. Plastics do not biodegrade. Instead they slowly break down into smaller pieces of plastic called micro plastics. It can take up to thousands of years for plastic bags and Styrofoam containers to decompose. In the meantime, it contaminates our soil and water. The toxic chemicals used to manufacture plastic gets transferred to animal tissue, eventually entering the human food chain. Our Institution recognizes this and wants to bring in a culture of Plastic free Campus for every stakeholder inside the campus. So following policy in this regard is framed.

## POLICY

1. Use of Single use Plastic is banned inside campus.
2. Cleanliness and hygiene should be maintained and plastic waste should not be littered in or around the campus.
3. Teaching staff should encourage students through lectures on not to use plastic and should inform policies involving use of plastic inside campus to them.
4. Activities spreading community awareness regarding damage caused by Plastic should be conducted on a regular basis.

## DISCIPLINARY CONSEQUENCES

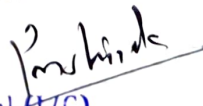

Any Staff or student violating the policy will be warned initially and on repeat default will be sanctioned and appropriate action will be taken on the defaulter.
